SUMMARY

Frontend Engineer and UI/UX Designer with a focus on building products that are as thoughtful as they are functional. I care just as much about how something works as how it looks. From mobile apps to web platforms to brand identities, I like solving problems with clean, thoughtful design. My experience spans early-stage startups and independent clients, where I've taken ownership across multiple disciplines to drive projects from concept to completion.

EXPERIENCE

Freelance

May 2026 - Present

Web Design and Development (Figma, React, Vanilla CSS , GSAP)

Muscat, Oman

- **Bahjat Al Afkar** - Interior Fit-outs & fabrication company needed a complete brand overhaul; delivered full logo design, visual identity, and a responsive multi-page website from scratch. [Live Site](#)
- **Sihir Design Studio** - Creative studio needed an online presence to showcase their work; designed the brand identity and logo, and developed a sleek single-page site with a hero and projects section. [Live Site](#)

Haffaf Digital

Mar 2026 - Apr 2026

Frontend & UI/UX Designer - Contractual

Muscat, Oman

- Designed and developed a responsive **email marketing landing page** using framer, focusing on conversion-driven UI/UX.
- Ensured **visual consistency** and brand alignment across multiple company web properties. [framer view link](#)

Insite

June 2025 - Oct 2025

UX intern - Remote

London, UK

- Conducted beta testing and provided actionable feedback on design, communication, and user experience.
- Contributed to major UI/UX improvements based on usability testing and user feedback, improving user retention by an estimated **30%**.
- Contributed research insights that directly shaped product features and marketing positioning.
- Gained exposure to **product-led** growth strategies and collaborated cross-functionally with marketing teams.

Incubix

June 2023 - Mar 2025

Frontend & UI/UX - Remote

Muscat, Oman

- Designed and developed responsive web interfaces using modern frontend technologies, ensuring cross-device compatibility.
- Created user-centered UI/UX designs through wireframing, prototyping, and usability testing in Figma.
- Collaborated with developers and stakeholders to translate requirements into intuitive user experiences.
- Improved user engagement and accessibility by refining layouts, typography, and interactions.

PROJECTS

Bachelor Thesis Project : PlayPal | *Figma, Dart, Firebase, Git*

Nov 2024 - July 2025

- A **community-driven** mobile platform connecting football players to discover, create, and join local matches.
- Designed end-to-end **UI/UX** including wireframes, user flows, and high-fidelity prototypes in **Figma**.
- Developed a **cross-platform** mobile app for creating and joining football matches.
- Implemented secure login, real-time **Firestore synchronization**, and admin-reviewed payment verification.
- Built **in-app chat** and **push notifications** to enhance user engagement and collaboration.

Sufrah Muscat | *React, Node.js, Supabase*

Jan 2026 - Present

- Developing a web app for users to rate and discuss their favorite food spots in Muscat.
- Implemented user authentication, database management, and real-time updates using **Supabase**.
- Designed a **responsive** and interactive UI in **React**, enabling users to review, comment, and bookmark locations.
- Integrated **map-based** features for location discovery and enhanced user engagement.

DESIGN & CREATIVE WORK

Brand Identity & Visual Design | *Freelance*

(Click for Behance Portfolio)

- Designed logos, brand identities, and visual systems for multiple clients across different industries.
- Developed cohesive brand guidelines including typography, color palettes, and usage rules.
- Created high-quality portfolios, proposals, and marketing materials used in client acquisition.
- Produced client-facing presentations and mockups to communicate design concepts effectively.
